Notes:

[1] Products may be combined with the distribution tariffs in the respective columns only.

[2] The prices for related services in the electricity sector are set in the amount pursuant to the effective ERO Price Decisions No. 13/2025 and No. 14/2025; the tax on electricity is set pursuant to Act No. 261/2007 Coll. PRE cannot in anyway influence these prices.

[3] In accordance with the ERO Price Decisions No. 14/2025, the number of hours in the low-tariff rate will change to 20 hours in 2026.

How can you calculate your total annual payment for electricity?

HT = annual consumption in HT × (row 25 = 1 + 4 + 5 + 23)

+ LT = annual consumption in LT × (row 26 = 2 + 4 + 6 + 23)

+ monthly payments = 12 × (row 3 + one of the rows 7–20 based on circuit breaker amperage + row 24)

+ the lower result of possible renewable surcharge calculations:

based on consumption = electricity consumed × row 22 , or based on circuit breaker amperage = 12 × main circuit breaker amperage × number of phases × row 21
