	[CZK/MWh]	maximum amount of the renewable surcharge is defined as electricity consumption multiplied by the price of 495,00												29

The price for distribution assurance for the distribution rate C60d is set either in the amount of 49,44 (or 24,08) CZK/month for every (even incomplete) 10 W of installed capacity or to a permanent price 49,44 CZK for supply point/month.

All prices are shown without VAT.

Notes:

¹⁾ Products may be combined with the distribution tariffs in the respective columns only.

²⁾ In accordance with Energy Regulatory Office price decision No. 9/2021 (applicable to the electricity distribution network operated by PREdistribuce, a. s.). The renewable energy surcharge and the prices for system services and market operator services are determined by Energy Regulatory Office decision No. 8/2021; the electricity tax rate is determined by Act No. 261/2007 Sb. Prices of related services are determined by the price decision of the Energy Regulatory Office and cannot be influenced by PRE in any way.

How can you calculate your total annual payment for electricity?

HT = annual consumption in HT × (row 25 = 1 + 4 + 5 + 23)

+ LT = annual consumption in LT × (row 26 = 2 + 4 + 6 + 23)

+ monthly payments = 12 × (row 3 + one of the rows 7–20 based on circuit breaker amperage + row 24)

+ the lower result of possible renewable surcharge calculations:

based on consumption = electricity consumed × row 22, or based on circuit breaker amperage = 12 × main circuit breaker amperage × number of phases × row 21
