[CZK/month]	99,00							

Electricity without worries

The base product is suitable for all types of consumption points regardless if it is house, flat or cottage. The prouduct is suitable for lighting, cooking, household appliances and gardening equipment, water heating and heating.

Benefits for you

- electricity price is not fixed
- possibility to change the product anytime you want
- professional customer service free of charge

Pražská energetika, a. s., is a holder of quality management system certificate according to ČSN EN ISO 9001, environmental management system certificate according to ČSN EN ISO 14001 and Safe Enterprise

	monthly payments [CZK/month]	**99,00** + fee based on circuit breaker amperage + **5,40**												27
	Surcharge for electricity from subsidized sources (renewables surcharge) [CZK/A/month]	main circuit breaker amperage × number of phases × **15,05**												28
	Surcharge for electricity from subsidized sources (renewables surcharge) [CZK/MWh]	maximum amount of the renewable surcharge is defined as electricity consumption multiplied by the price of **495,00**												29

The price for distribution assurance is set either in the amount of 23,39 CZK/month for every (even incomplete) 10 W of installed capacity or to a permanent price 23,39 CZK for supply point/month.

All prices are shown without VAT.

Notes: [1] Products may be combined with the distribution tariffs in the respective columns only. [2] In accordance with Energy Regulatory Office price decision No. 7/2017 (applicable for the electricity distribution network operated by ČEZ Distribuce, a.s.). The renewable energy surcharge and the price of system services and market operator services is determined by Energy Regulatory Office decision No. 6/2017; the electricity tax rate is determined by Act No. 261/2007 Sb. Prices of related services are determined by the price decision of the Energy Regulatory Office and cannot be influenced by PRE in any way.

How can you calculate your total annual payment for electricity?

HT = annual consumption in HT × (row **25** = **1** + **4** + **5** + **23**)
+ **LT** = annual consumption in LT × (row **26** = **2** + **4** + **6** + **23**)
+ **monthly payments** = 12 × (row **3** + one of the rows **7–20** based on circuit breaker amperage + row **24**)
+ **the lower result of possible renewable surcharge calculations**:
based on consumption = electricity consumed × row **22**, or based on circuit breaker amperage = 12 × main circuit breaker amperage × number of phases × row **21**
