How can you calculate your total annual payment for electricity?
HT = annual consumption in HT × (row **25** = **1** + **4** + **5** + **23**)
+ LT = annual consumption in LT × (row **26** = **2** + **4** + **6** + **23**)
+ **monthly payments** = 12 × (row **3** + one of the rows **7–20** based on circuit breaker amperage + row **24**)
+ **the lower result of possible renewable surcharge calculations**:
based on consumption = electricity consumed × row **22**, or based on circuit breaker amperage = 12 × main circuit breaker amperage × number of phases × row **21**
