Prices printed in bold are inclusive of VAT, prices in brackets are exclusive of VAT. Prices inclusive of VAT are only approximate, as they have been calculated on the basis of prices exclusive of VAT and rounded up/down.

Notes:

[1] Products may be combined with the distribution tariffs in the respective columns only.

[2] The prices for related services in the electricity sector are set in the amount pursuant to the effective ERO Price Decisions No. 13/2025 and No. 14/2025; the tax on electricity is set pursuant to Act No. 261/2007 Coll. PRE cannot in anyway influence these prices.

[3] In accordance with the ERO Price Decisions No. 14/2025, the number of hours in the low-tariff rate will change to 20 hours in 2026.

How can you calculate your total annual payment for electricity?

HT = annual consumption in HT × (row 25 = 1 + 4 + 5 + 23)

+ LT = annual consumption in LT × (row 26 = 2 + 4 + 6 + 23)

+ monthly payments = 12 × (row 3 + one of the rows 7–20 based on circuit breaker amperage + row 24)

+ the lower result of possible renewable surcharge calculations:

based on consumption = electricity consumed × row 22 , or based on circuit breaker amperage = 12 × main circuit breaker amperage × number of phases × row 21
