

# PRE PROUD NEFIX

Electricity price list for households valid from 1. 1. 2023  
in the **PREdistribuce, a. s. distribution territory**

## Use a reliable supply of electricity for an indefinite period

PRE PROUD NEFIX is suitable for all types of supply points, regardless if it is a house, apartment or cottage. It is suitable for lighting, cooking, using household appliances or gardening equipment, hot water and heating.

### Advantages for you

Contract for  
an indefinite period

Possible to change  
product at any time

Quality free  
customer service

Stable Supply  
of electricity for 125 years

**!** From 1 January 2023, we will automatically charge you the price of electricity supply in the amount pursuant to Decree of the Government No. 298/2022 Coll. This **capped** price for electricity supply and fixed monthly payments (excl. tax and the prices of related services in the electricity sector in the amount pursuant to the effective price decision of the ERO) amount to a maximum of **CZK 5 000/MWh (CZK 6 050/MWh incl. VAT)** and **CZK 130/month (CZK 157,30/month incl. VAT)**. Upon termination of the regulation, you will be charged the price set forth in the pricelist valid for your product.

	[CZK/MWh]	are not applied											29

Prices printed in bold are exclusive of VAT, prices in brackets are inclusive of VAT. Prices inclusive of VAT are only approximate, as they have been calculated on the basis of prices exclusive of VAT and rounded up/down.

Notes:

<sup>1)</sup> Products may be combined with the distribution tariffs in the respective columns only.

<sup>2)</sup> The prices for related services in the electricity sector are set in the amount pursuant to the effective ERO Price Decisions No. 13/2022 and No. 14/2022; the tax on electricity is set pursuant to Act No. 261/2007 Coll. PRE cannot in anyway influence these prices.

How can you calculate your total annual payment for electricity?

HT = annual consumption in HT × (row 25 = 1 + 4 + 5 + 23)

+ LT = annual consumption in LT × (row 26 = 2 + 4 + 6 + 23)

+ monthly payments = 12 × (row 3 + one of the rows 7–20 based on circuit breaker amperage + row 24)

+ the lower result of possible renewable surcharge calculations:

based on consumption = electricity consumed × row 22, or based on circuit breaker

amperage = 12 × main circuit breaker amperage × number of phases × row 21

**Capped prices for electricity supply charged from 1 January 2023 pursuant to Decree of the Government No. 298/2022 Coll.**

Prices printed in bold are exclusive of VAT, prices in brackets are inclusive of VAT. Prices inclusive of VAT are only approximate, as they have been calculated on the basis of prices exclusive of VAT and rounded up/down. The capped prices for electricity supply are valid for the period during which Decree of the Government No. 298/2022 Coll. is in force. Upon expiry of the decree's validity, we will charge you the price according to the valid PRE pricelist for your product.

Notes:

1) Products may be combined with the distribution tariffs in the respective columns only.

2) The prices for related services in the electricity sector are set in the amount pursuant to the effective ERO Price Decisions No. 13/2022 and No. 14/2022; the tax on electricity is set pursuant to Act No. 261/2007 Coll. PRE cannot in anyway influence these prices.

How can you calculate your total annual payment for electricity?

HT = annual consumption in HT × (row 25 = 1 + 4 + 5 + 23)  
 + LT = annual consumption in LT × (row 26 = 2 + 4 + 6 + 23)  
 + monthly payments = 12 × (row 3 + one of the rows 7–20 based on circuit breaker amperage + row 24)  
 + the lower result of possible renewable surcharge calculations:  
 based on consumption = electricity consumed × row 22, or based on circuit breaker amperage = 12 × main circuit breaker amperage × number of phases × row 21
