

The gas price consists of

Price of gas supply

Part of the gas price which we CAN INFLUENCE – determined by the gas supplier

- Price for consumed gas
- Fixed monthly charge for the consumption point

Price of related services and taxes

Part of the gas price we CANNOT INFLUENCE – determined by the relevant authorities (the price of distribution and related services is determined by the Energy Regulatory Office and tax rates by law)

- Fixed price of gas distribution including the market operator services and operator services price
- Fixed monthly charge for delivered capacity
- Gas tax (Household category customers do not pay this tax according to Section 8, Article LXXII of Act No. 261/2007 Coll.)
- VAT (Applicable VAT rate)

Overview of distribution areas

RWE - RWE GasNet, s. r. o.

E.ON - E.ON Distribuce, a. s.

PPD - Pražská plynárenská Distribuce, a. s.

Convenient Energy for you

PRE Customer line

Tel.: 267 055 555, 840 550 055

		Consumed gas price	Fixed monthly charge	Fixed gas distribution price**	Fixed monthly capacity charge	Sum total consumed gas price	Consumed gas price	Fixed price for annual capacity
		CZK/kWh	CZK/month	CZK/kWh	CZK/m³	CZK/kWh	CZK/month	CZK/m³
	over 63 000 up to 630 000	0,86000 (1,0406)	920,35 (1113,62)	0,11228 (0,13586)	121,26052 (146,72523)	0,97228 (1,17646)	920,35 (1113,62)	121,26052 (146,72523)

Calculation of the total annual payment of consumed gas (model example is calculated for billing for 12 months)

Calculation of the total annual payment

(consumption under 63 000 kWh)

Calculation of the total annual payment:
consumed gas price (A) + monthly charges (B)

(A) = annual consumption (in kWh) × (column 1 + column 3)
(B) = 12 × (column 2 + column 4)

Calculation of the total annual payment

(consumption over 63 000 kWh)

Calculation of the total annual payment:
consumed gas price (A) + monthly charges (B) + annual charge for capacity (C)

(A) = annual consumption (in kWh) × (column 1 + column 3)
(B) = 12 × (column 2)
(C) = column 4 × (annual consumption in m³/115)

The approximate conversion 1 m³ = 10.55 kWh is applied to convert the volume of consumed natural gas from m³ to kWh.

Determining the monthly charge for the capacity price component (MPps)

For the consumption point (CP) with annual consumption over 63 000 kWh the monthly charge for the capacity price component is determined according to formula:

$MPps = (Cps \times RK) / 12$
where Cps = price for capacity according to the price list (column 4)

RK = daily allocated fixed capacity at the respective CP in m³ determined according to formula $RK = RS / 115$, where RS is the annual consumption at the respective CP in m³

Notes and annotations:

The prices in bold exclude VAT, the prices in brackets include VAT. The top limit of the band above 63 000 kWh/year under 630 000 kWh/year is limitless for the household category. The total end price including VAT serves only as reference for the customer and was calculated from the price excluding VAT and is rounded up. The prices exclude natural gas tax (environmental tax). m³ = cubic metre, kWh = kilowatt hour (1 kWh = 0.001 MWh)

* This means the converted annual consumption determined by the distributor in accordance with relevant legislation. ** The price excludes the payment for the Energy Regulatory Office services; this payment is regulated by a government directive.
