

## The gas price consists of

### Price of gas supply

Part of the gas price which we CAN INFLUENCE – determined by the gas supplier.

- Price for consumed gas
- Fixed monthly charge for the consumption point

### Price of related services and taxes

Part of the gas price we CANNOT INFLUENCE – determined by the relevant authorities (the price of distribution and related services is determined by the Energy Regulatory Office and tax rates by law)

- Fixed price of gas distribution including the market operator services and operator services price
- Fixed monthly charge for delivered capacity
- Gas tax (Household category customers do not pay this tax according to Section 8, Article LXXII of Act No. 261/2007 Coll.)
- VAT (Applicable VAT rate)

## Calculation of the total annual payment of consumed gas (model example is calculated for billing for 12 months)

### Calculation of the total annual payment

(consumption under 63 000 kWh)

Calculation of the total annual payment:  
consumed gas price (A) + monthly charges (B)

(A) = annual consumption (in kWh) × (column 1 + column 3)  
(B) = 12 × (column 2 + column 4)

### Calculation of the total annual payment

(consumption over 63 000 kWh)

Calculation of the total annual payment:  
consumed gas price (A) + monthly charges (B) + annual charge for capacity (C)

(A) = annual consumption (in kWh) × (column 1 + column 3)  
(B) = 12 × (column 2)  
(C) = column 4 × (annual consumption in m<sup>3</sup>/115)

The approximate conversion 1 m<sup>3</sup> = 10.55 kWh is applied to convert the volume of consumed natural gas from m<sup>3</sup> to kWh.

### Determining the monthly charge for the capacity price component (MPps)

For the consumption point (CP) with annual consumption over 63 000 kWh the monthly charge for the capacity price component is determined according to formula:

$MPps = (Cps \times RK) / 12$   
where Cps = price for capacity according to the price list (column 4)

RK = daily allocated fixed capacity at the respective CP in m<sup>3</sup> determined according to formula  $RK = RS / 115$ , where RS is the annual consumption at the respective CP in m<sup>3</sup>

## Notes and annotations:

The prices in bold exclude VAT, the prices in brackets include VAT. The top limit of the band above 63 000 kWh/year under 630 000 kWh/year is limitless for the household category. Prices inclusive of VAT are only approximate, as they have been calculated on the basis of prices exclusive of VAT and rounded up/down. The prices exclude natural gas tax (environmental tax). m<sup>3</sup> = cubic metre, kWh = kilowatt hour (1 kWh = 0.001 MWh)

\* This means the converted annual consumption determined by the distributor in accordance with relevant legislation. \*\* The fixed price for gas distribution includes a fixed fee for the market operator's activities equalling to 2,40 CZK/MWh (fixed clearing price of 1,06 CZK/MWh and a special fee of 1,34 CZK/MWh, as determined by a government regulation, for the operations of the Energy Regulatory Office pursuant to Section 17d of Act No. 458/2000 Sb., as amended).
